

PROJECT DESCRIPTION

I. GENERAL

This portion of the project involves the reconstruction of existing Traffic Control Signals at the intersection of US 1 and Hamilton Street in Prince George's County. US 1 is assumed to run a north-south direction. The signal shall be interconnected to Jefferson Street the north and to Hamilton Street / US 1 Alt to the south.

II. INTERSECTION OPERATION

- The intersection is to operate in a NEMA three-phase, semi-actuated mode, with the US 1 approaches running concurrently. A pedestrian phase with pushbutton actuation shall be provided across the north leg of US 1. The pedestrian phase across Hamilton Street shall be on recall. The Hamilton Street approach shall run in its own phase. Detection shall be provided via video detection.
- A full-traffic-actuated, eight-phase controller with all necessary equipment housed in a NEMA size "6" base-mounted cabinet shall be installed at this intersection.

III. SPECIAL NOTES

- The Contractor shall be responsible for terminating all signal cables, excluding interconnect, to the appropriate terminals and shall properly label each cable.
- All controller cabinet wiring will be performed by the S.H.A. Signal Shop Contact Mr. Ed Rodenhizer at (410) 787-7650 seventy-two hours in advance of intended work.
- All underground and overhead utilities shown on these plans are schematic only and may not be complete. The Contractor shall be responsible for notifying Miss Utility prior to construction so that all utilities may be located in the field. If the Contractor perceives that a conflict between the utilities and the traffic signal will occur, the Contractor shall notify the Project Engineer immediately so that the conflict may be resolved.
